Commerce education is an applied branch of knowledge. In order to supplement the theoretical and conceptual knowledge imparted in the classroom, the practical exposure to the students and staff is essential. We propose to establish a Commerce Laboratory from the next academic year in our College. Under this, we shall have static display of latest events and happenings in the field of commerce, management, law and computers. Further, the students, under the guidance of their teachers, shall undertake surveys, opinion polls, etc. useful to understand the present scenario of business and industry. The Commerce Laboratory shall be an excellent platform for students as well as faculty to interact on academic issues and to appreciate the thrilling world of commerce.

3. Short Term Research Projects :-
